JPMorgan Chase & Co.
India

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer position at JPMorgan Chase & Co., as advertised. With a strong academic background in Computer Engineering from Thapar Institute of Engineering and Technology, a CGPA of 9.94, and hands-on experience in software development through various projects and internships, I am excited about the opportunity to contribute to your innovative team.

During my tenure as a Core Member of the Google Developer Student Club (GDSC) at TIET, I took on challenging projects such as developing the official GDSC website, where I collaborated closely with frontend and backend teams. This experience honed my ability to own projects end-to-end, ensuring that stakeholders were constantly updated on progress while implementing enhancements that improved user experience. Additionally, my role involved creating an interactive quiz game using OpenCV, which not only engaged users but also showcased my skills in real-time object detection.

As a member of the ACM chapter, I further developed my project management skills by organizing technical events, focusing on fostering a collaborative and inclusive environment. I built an object catcher game that combined innovative gameplay mechanics with hand movement detection, a testament to my ability to create solutions that resonate with users.

What excites me most about the Software Engineer role at JPMorgan Chase & Co. is the emphasis on collaboration and innovation. I thrive in dynamic, agile environments where ideas flow freely, and I welcome the opportunity to work alongside talented technologists from around the world. My experience with technologies like React, Node.js, and OpenCV has equipped me with a diverse skill set to tackle complex challenges and contribute to meaningful solutions.

Moreover, I understand the importance of ongoing training and mentorship. I am eager to learn from the senior leaders at JPMorgan Chase & Co. and further develop my technical baseline knowledge across disciplines such as cloud computing and artificial intelligence. I am committed to contributing to a culture that values innovation and inclusivity, aligning well with your organization's goals.

I would be delighted to discuss how my background, skills, and enthusiasm align with the needs of your team, and how I can contribute to the innovative projects at JPMorgan Chase & Co.. Thank you for considering my application. I look forward to the opportunity to speak with you further.

Warm regards,
Armaan Gogoi
